ITROLABagri

Laboratory Management System to ITROLABagri

Dear Sir, Madam

ITROLABagri's service laboratories are located in different countries around the world, and consist of various types of laboratories for example microbiology, chemistry, water testing, pesticide residues testing, soil testing, Research and Development lab etc.

It came to my attention that **ITROLABagri** company wish to select and implement Laboratory Information Management System (LIMS).

The designated system will manage the processes for receiving the samples, managing tests and locating the status of the sample handling, managing devices and batch processes, sending results to the company's customers and more. The system will enable data analysis and retention.

Sincerely, please receive the enclosed details about the knowledge and experience provided by the experts of **Citrine Solutions Company Ltd**. (hereby: **Citrine Solutions**), to accompany the process of vendor selection and implementation of LIMS in **ITROLABagri** laboratories.

Expert services provided by **Citrine Solutions** and led by Mrs. **Eti Eliassi**, Joint-CEO of the company, include Business analysis, collection of system requirements, vendor locating and systems assessments, managing the LIMS project implementation.

Eti Eliassi is an experienced certified Business & Systems Analyst, and certified Chief Information Management officer (CIO).

Eti Eliassi was graduate with honor Master of Business Administration (MBA) in finance and marketing, B.Sc. degree in Computer Applications, B.Sc. degree in Life sciences.

Eti Eliassi is familiar with the various LIMS in the market, and provide the experience of both software engineering and service lab management, that will allow better identification and characterization of the system requirements, project management and risk management while maintaining quality and professionalism, gap analysis, adequate representation of the various challenges arising from multi-labs And multiplicity of scientific instrumentation.
