

CITRINE
SOLUTIONS

Innovation. Excellence. Expertise

CITRINE SOLUTIONS

CITRINE Solutions Ltd. is a boutique consulting firm with extensive experience and a proven record of accomplishment in advisory services for the following fields:

Life Science & Diagnostic Laboratories

Establishing laboratories
(COVID-19, Cannabis, Biotech)

Digital Health & Medical Technologies

Technology assessment, design
and integration for digital products

We bring our in-depth knowledge to assist in improving the business model, identifying and managing risks, developing methodologies, shortening bureaucratic processes and reducing uncertainty in competitive fields. Citrine Solutions specializes in analyzing and closing the gaps between the health organization's requirements and the limitations of the products in the development stages. Our professional services will guide you throughout the project life cycle.

We consult for top level laboratories, identifying optimal locations and imparting the highest safety and GLP standards.

AMONG OUR CLIENTS

We have been privileged to work closely with top ranking laboratories, incubators and startups, health care organizations, hospitals, biotech companies, R&D initiatives and government organizations. Our clients include entrepreneurs, CEOs, lab managers and researchers.

TESTIMONIALS

"The consultant was on point with the details and had everything under control..."

"The consultant pinpointed the essence of the project immediately, and provided insightful advice throughout..."

"You definitely helped push the project forward..."

"Thank you. It was delightful working with you ..."

"You brought your vast knowledge and experience to capture the project's full potential..."

FEATURED PROJECTS

Israeli Ministry of Health (MOH)

Managing the Challenge Program – assisting 14 startup companies and health care organizations to define and implement digital healthcare solutions, including face recognition, drug interaction monitoring, elderly monitoring and fall prevention, hybrid medicine, and care giver management.

Maccabi Healthcare Services, DAPHNE Project, EU's Horizon 2020 program

Project Manager – Collaborating to design the mobile application that collects data from wearable sensors and integrates it into Electronic Medical Records (EMR), using analysis pipelines, high-performance computing (HPC), and machine learning (ML) technologies.

Aid Genomic (Innovative genomic diagnostic company)

Consulting to the CEO for the design and construction of several private COVID-19 laboratories with high-yield sampling and testing. Subsequently, providing health & safety inspection services.

Mariana Bio Science (Innovative R&D company)

Consulting to the CEO for the design, construction and equipment selection for a private cannabis research laboratory to work on the genetic control of cannabinoids.

FROM FEASIBILITY TO RIBBON CUTTING

Whether you want to establish a new laboratory, an initiative for health care or a digital health solution, you can choose the level of service that provides for your needs at every stage of the process. CITRINE Solutions professionals will be there to assist.
